- Fixes an issue where the Work Orders and Job Sites features are missing [*Related Issues: #8591, #8598, #9252*]
- Fixes an issue where a missing required data diagnostic is not being cleared [*Related Issues: #7464, #7677, #8016, #8075, #8386, #8391*]
- Time Remaining dialog
  - Fixes an issue where the Time Remaining is incorrect after performing Split Sleeper [*Related Issues: #9156*]
- Canada Regulations
  - Updating the OffDuty Deferral Warning dialog that resets the invalid deferral from "The OffDuty Deferral requirements were not met. OffDuty Deferral has been removed and reset." to "Your original OffDuty Deferral request is no longer valid. Therefore OffDuty Deferral has been removed and reset. If you desire to defer time please re-request the deferral."
  - Fixes an issue where the Engine Sync Malfunction randomly occurred for new driver in a new vehicle after VBUS connection
  - ELD CSV Output File
    - Fixes an issue where the CMV List is showing duplicated vehicle
    - Fixes an issue where the User List is showing incorrect ranking of users
    - Fixes an issue where the Latitude/Longitude is recording 'E', 'E' even if there's no Position Compliance Malfunction
    - Fixes an issue where the Event Data Check value of the default Off Duty is incorrect
    - Fixes an issue where the Event Data Check values are incorrect under the Unidentified Drivers Profile segment
    - Fixes an issue where the record originator of the default Off Duty is incorrect
    - Fixes an issue where there's no assigned CMV Order Number when the driver logs in with no vehicle
  - ELD PDF Output File
    - Fixes an issue where the Latitude/Longitude is recording 'E', 'E' even if there's no Position Compliance Malfunction
